Dear Dr. Lederman.

Your letter of Sept 9 reached me just as I was leaving for the airport to visit the U.S. I am sincerely sorry that by some extraordinary slip of memory or card-indexing, I placed you at Cal Tech. I'll try to get later editions and trans ~~lectures~~ lectures altered.

I don't have a copy of the book here to go into the quotation point, but will on my return. I believe the word "finkering" (not as bad as "tampering") came from Gerald Leach's radio interview of which I obtained a transcript.

I have to make a number of TV and radio interviews while I'm here and shall try to put the point you make in your last paragraph.

GORDON RAY TAYLOR

I plan to spend one night in San Francisco - that of Tuesday Oct 1st, if I can make the plane after taking part in the Today program. Would there be any chance of our meeting, say in the morning of Oct. 2nd? I have to get to L.A. that afternoon.

(My main object in travelling via S.F. is to find out about the work of one Joe Kamiya, whom I take to be an electroencephalographer, but I haven't yet discovered where he works; & so don't know if this suggestion is feasible.)

There are a number of points arising which I think it could be mutually interesting to discuss, if you can spare the time. I'll be at the St. Moritz Sept 23-5 then Washington and Yale, back at St. Moritz for night of 30th.

Unreservedly yours.

Expect to stay at the Cliff in S.F. J. Rutherford Taylor
